

The GARDEN of LIFE, **Dr. MARKS, Artist in Herbs.**

BY successful Practice of Thirty Years, he gives proper advice in all cases of Physic and Surgery; particularly Blindness, Lameness, and Deafness, if curable; the Dropsy without tapping; White Swellings, King's Evil, Cancer, Yellow Jaundice, and sore Legs, without any Plaisters; all sorts of Fits, in Young or Old, of ever so long standing, and the Gravel and Stone without cutting; likewise the Rheumatism and Palsy, Scurvy in the Blood, Leprosy, Venereal Complaints of what kind soever, by a sure and safe method never made public, without any Mercury or Salivation, from the slightest infection to the most confirmed Lues, by the Virtue of Herbs. As there are several Quacks who pretend to cure the Venereal, who being quite ignorant of that Disorder, ruin Hundreds; by giving them Mercury, and other loathsome Drugs, which gets into their Bones, and brings on a complication of Disorders never to be cured. He cures Wens on the Throat, without seeing the Patient; also fresh contracted Fevers in one Day, and any long contracted Fever in one Week, though ever so bad. All Defects in the Female Sex, cured in a surprising manner, even by any hurt in lying-in: also trembling in the Nerves, Swimming in the Head, Coughs, or shortness of Breath, and many other Disorders too tedious to mention; and if the Patients do not know their Disorders, by sending their Morning Urine, will inform them whether curable or not.---Likewise a Tincture for the Tooth-Ach, which never fails to cure in an instant---such a Tincture was never before known in Britain.

The Doctor undertakes no Patient without making a Cure, (with the Blessing of God) his Medicines may be taken by Sea as well as by Land.
